# How to add a blog in WordPress

Log into your WordPress admin section and click on **Posts> Add New** in the navigation menu.

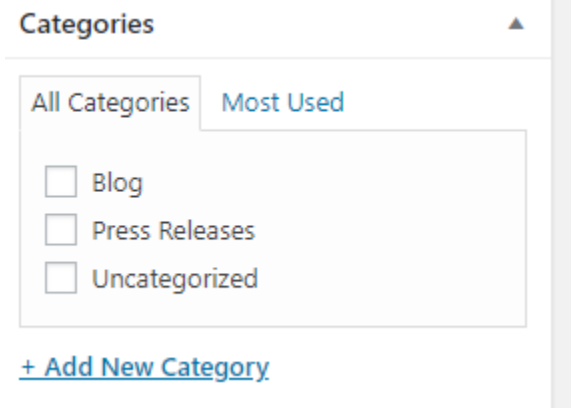

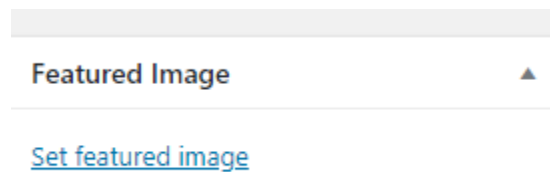

A **blank post** should be created:

The next step is to add the **post title** and the **content** either by typing or copying and pasting
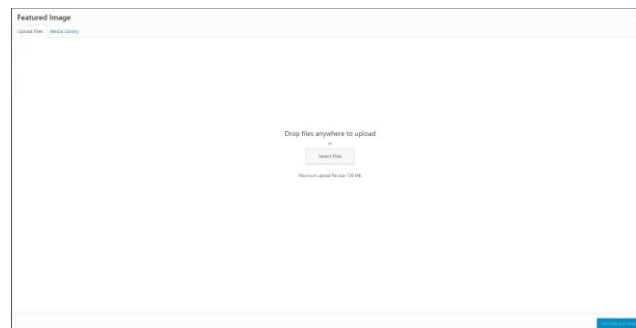

Now put the blog into a **category** (for example blog)

To then set a feature image press **select featured image**

Upload a file or chose from your media library and then press **set featured image**

Finally press **publish** or **save draft**
